DATE: April 27, 1984

NOTE TO:

SUBJECT: Wolf MFR

MEMORANDUM FOR THE RECORD: Telecon with Rep. Wolf, 27 April

1. At approximately 1510 the undersigned received a call from Ms. Nancy Bennett, aide to Rep. Frank Wolf. Ms. Bennett stated that she had been contacted by Lilla Richards of the Mclean Citizens who stated that the MCA was not pressing for a visitor center on the GW Parkway. She said that this had prompted the Congressman to change his views and that he wanted to discuss the issue further.

2. The Congressman then took the phone and stated that he wished to clarify the remarks made in our earlier conversation of 25 April (see previous MFR, same subject). He emphasized that his earlier position was based on his belief that he was acting on a major concern of his constituents. Based on his latest information he now viewed the visitor center issue as minor and did not wish to push the Agency into this action if in fact it was a complication to Agency operations.

3. The writer responded that we understood his motives and would continue to study the visitor center issue in any case.

4. Mr. Wolf then stated that he still felt strongly about the addition of a fifth lane on the inner beltway loop between Route 193 and the GW Parkway. He stated that he has requested the Fairfax County Transportation representatives to review his proposal and provide a professional opinion on the merits of his proposal. He stated that their preliminary response was to the effect that the plan is reasonable.

5. The writer stated that we were also pursuing this subject and that a meeting was scheduled with the DDA within the day to discuss possible courses of action.

6. Mr. Wolf reiterated the statement made in previous discussions of this proposal, i.e., he and Sen. Warner will work to obtain separate funding for this project if the Agency will put forward a serious proposal.
